## **New copper and Lead detox Clay Bath**

**Copper is viewed in two ways. The first is as a detrimental heavy metal accumulated in the system by drinking water from sources with copper plumbing. The second is that lack of copper causes a form of anemia. Many doctors in the alternative field feel it is an important mineral. According to one doctor, copper levels are restored through the addition of chlorophyll.**

**Sources:** *Beer (if copper brewery equipment), brackets and jewelry, copper cooking utensils, copper piping, copper in dental prostheses, fungicides, Hemodialysis, hormone pills, industrial emissions, insecticides, instant hot water has copper heater, IUD'S milk, (if copper rollers in pasteurization), mineral supplements, oral contraceptives, oysters, liver, nuts, chocolate, pink gold, refrigerator ice makers, some city water systems, swimming pools (fungicide), well water*

**Symptoms/Diseases associated with copper:** anemia, arthritis, atherosclerosis, bitter taste, deposits in corneas of the eyes, depression, diarrhea, digestive disorders, eczema, excitability, hardening of the skin, high blood pressure, hyperactivity, insomnia, kidney problems, liver dysfunction, mental disturbance, nasal irritation, nausea, schizophrenia, tuberculosis.

**LEAD may enter the body through ingestion, inhalation, or skin eruptions. Adults normally absorb 5-10% of ingested lead. Children can absorb up to 50%. Biochemically, lead appears to be an enzyme poison. Saturnine gout has been connected with lead at levels as little as 1 ppm.**

**Sources:** *automobile exhaust, canned fruit juices, car batteries, certain wines (leaded caps), cigarette smoke, crayons, evaporated milk, hair coloring, improperly glazed mugs, industrial air pollution, lead based paint, Mascara, pesticides, smelting of lead, zinc, copper, solder, toothpaste (leaded tubes), vegetables grown by the roadside, water from lead plumbing*

## **Benefits of LL's Magnetic Clay Baths**

1. The baths are an untreated, unaltered product, used for thousands of years. They utilize the Earth's natural healing properties.
2. The baths safe and effective as an aid to detoxification when used according to the bath instructions. One bath releases years of toxic environmental pollutants that have been accumulating--out of your body and into the bathtub.
3. The baths are inexpensive and do not require costly equipment. They can save you hundreds of dollars and lots of time compared to chelation therapy and other forms of environmental detoxification programs.
4. The baths can be taken in the privacy of your own home, with minimal inconvenience.
5. The healing properties of the baths can be maximized if used in combination with other cleansing and maintenance programs.
6. The formulas of all natural spices and herbs have been synergistically tested as well as specifically tested for the correct amounts to maximize the effectiveness of each of the formulas.
7. The baths now have available--CDA's. CDA's are Clay Dissolving Agents which enable easier clean-up after each bath. Use 1 set per 2 1/2 cups of clay.
8. The baths have been used in "before" and "after" scientific lab tests screening individuals for specific heavy metals and chemicals. These tests have confirmed that metals and other toxic chemicals are reduced to safer levels through the use of these special formulas.
